

"<p> and <pre> Tags"

<p> and <pre> Tags

<p> : Defines a paragraph, adds automatic spacing before and after, ignores extra spaces and line breaks.

<pre>: Displays preformatted text, preserves spaces, tabs, and line breaks; ideal for code or precise formatting.

INPUT

```
<!DOCTYPE html>
<html>
<head>
  <title>Paragraph and Preformatted Text
</title>
</head>
<body>

  <h1>HTML Example: p and pre Tags</h1>

  <!-- Paragraph example -->
  <p>This is a paragraph.
  Spaces and line breaks are not preserved.
</p>

  <!-- Preformatted text example -->
  <pre>
This is preformatted text.
  Spaces and line breaks are preserved.
    Indentation is also kept.
  </pre>

</body>
</html>
```
