

"CSS Float"

Float attribute

`style="float: left;":` Floats the image to the left, and the text wraps around it.

`style="float: right;":` Floats the image to the right, and the text wraps around it.

`style="float: none;":` No floating; the image is placed in the normal document flow, and text does not wrap around it.

INPUT

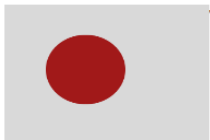

```
<!DOCTYPE html>
<html >
<head>

  <title>Float Attribute Example</title>
</head>
<body>
  <!-- Image with float: left -->
  
  <p>This paragraph wraps around the left-floated image.</p>

  <!-- Image with float: right -->
  
  <p>This paragraph wraps around the right-floated image. </p>

  <!-- Image with float: none -->
  
  <p>This paragraph does not wrap around the non-floated image.</p>
</body>
</html>
```

OUTPUT

This paragraph wraps around the left-floated image.

This paragraph wraps around the right-floated image.

This paragraph does not wrap around the non-floated image. The image is positioned according to the normal document flow.
