

" HTML - Audio /Video/
meta"

Key points

1. **video**: Displays video.
2. **audio**: Plays audio.
3. **loop**: Repeats media.
4. **controls**: Shows player controls.
5. **muted**: No sound.
6. **poster**: Thumbnail image.
7. **autoplay**: Starts automatically.
8. **<meta name="viewport" content="width=device-width, initial-scale=1.0">** tag is crucial for making your website responsive on different devices, especially mobile phones and tablets. Here's a breakdown:
 - **meta**: Provides metadata about the HTML document.

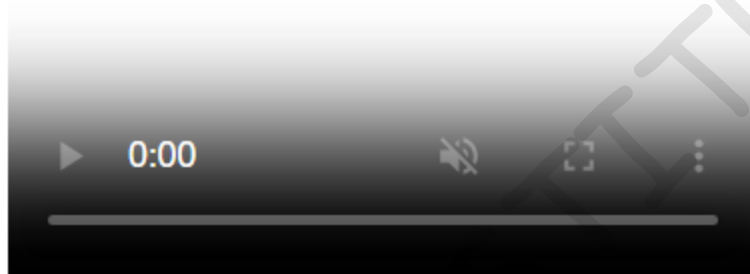

-
- **name="viewport"**: Targets the viewport (the visible area of a webpage on a device).
 - **content="width=device-width"**: Sets the width of the page to match the screen width of the device (e.g., phone, tablet).
 - **initial-scale=1.0**: Sets the initial zoom level when the page loads (1.0 means no zoom).

Purpose:

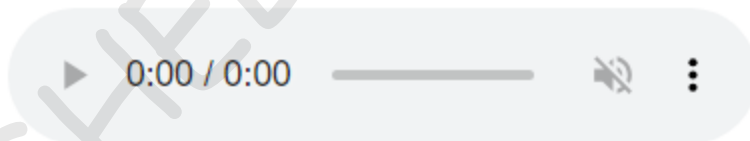

- Ensures that the website adjusts properly to different screen sizes (mobile, tablet, desktop).
- Prevents the page from shrinking or enlarging when viewed on smaller devices.

Output

video tag

audio tag

Input

```
<!doctype html>
<html>
<head>
<title>page title</title>
<meta name="viewport" content="width=device-width,initial-scale=1.0">
</head>
<body>
<h1>video tag</h1>
<video src="video location" height="200" width="300" poster="image location" controls
autoplay MUTED loop>
</video>

<br>
<br>
<br>
<h1>audio tag</h1>
<audio src="sound location" loop controls muted>
</audio>

</body>
</html>
```
